

## AN INTRUSIVE MOUND POINT

by  
Jim Stephan  
Bradford, OH

This Intrusive Mound Point was found in Miami County Ohio, north of Piqua in the early 1900's, and reportedly stored in a trunk where it was recently discovered. It measures 5½ inches in length and is made of high quality Upper Mercer flint. Intrusive Mound Points are placed in the 600 A.D. to 900 A.D. time period.

## NEW BOOK IN THE OFFING

A new book by Robert N. Converse — *PREHISTORIC STONE TOOLS — A Guide to the Age and Identification of the Stone Tools Used by the Prehistoric People of the Ohio Area* — is at the printers. The Ohio Archaeologist

book illustrates and offers a detailed analysis of the many hardstone tools found in Ohio and adjacent states. More than 180 pages of color plates and drawings will be shown. Further information on this impor-

tant book will be sent to ASO members and announced to the public in the next issue of the Ohio Archaeologist.
